

## Product Information

# Stokolan® Classic

**Highly concentrated skin care cream that has been proven very effective in helping to replace lost moisture and oils thereby helping to prevent dry, rough, chapped and even cracked skin caused by work-related conditions.**

### Description

Highly concentrated skin care cream for hands and face. Time-tested qualities for heavily-stressed skin. Stokolan® Classic is a concentrated, silicone-free conditioning cream that spreads easily and works quickly into the skin. Stokolan® Classic has been proven very effective in helping to replace lost moisture and oils thereby helping to prevent dry, rough, chapped and even cracked skin caused by work-related conditions. If applied regularly, it helps to maintain skin health, keeping it soft and providing a smooth appearance.

### Area of Application

Ideal for use in any industrial setting, as well as many other workplace settings. It is particularly helpful in situations where people have to work with solvents, without gloves and where people are exposed to cold and/or dry weather conditions. Suitable for all types of skin.

### Product Description

White, silicone-free cream with fragrance. Emulsion type oil-in-water (o/w).

### Instructions for Use

Apply only to clean and dry skin after-work.

In cases where no special pre-work skin products are used, it can be applied before work and after breaks.

Suitable for facial use as well.

Features	Benefits
Concentrated Moisturizer (High Lipid Content)	Helps to add moisture that has been depleted during workday. Also means product does not have to be reapplied after every hand wash Leaves soft, smooth skin with regular use
Non-greasy Formula	Workers won't lose their grip on tools, equipment, etc
Gender neutral fragrance	Appeals to male and female workers
Silicone-free	No adverse effects when coating surfaces
Dermatologically confirmed skin compatibility ECARF awarded	Very good skin compatibility Ideal for people suffering from allergies Suitable for sensitive and eczema-prone skin

### Ingredient List

AQUA (WATER), PARAFFINUM LIQUIDUM, GLYCERIN, GLYCERYL STEARATE SE, LANOLIN , STEARIC ACID, CETEARYL ALCOHOL, UREA, POTASSIUM STEARATE, METHYLPARABEN, DEHYDROACETIC ACID, SORBIC ACID, PROPYLPARABEN, PARFUM (FRAGRANCE)

### Statutory Regulations

This product is manufactured and labeled in compliance with the Federal Food, Drug, and Cosmetic Act.

### Safety Data Sheet

Safety Data sheets are available from [www.debgroup.com/us/msds](http://www.debgroup.com/us/msds).

### Quality Assurance

All raw materials used for production undergo a thorough quality control process before being used for manufacturing in Deb's high quality products.

All finished goods are subject to intensive quality testing before being shipped out to our customers.

All products meet the bacterial purity standards as they apply to medicines for external use (as defined by Ph. Eur.).

< 10<sup>2</sup> reproducible germs / g product.

Verification tests in this respect are a regular feature of our quality assurance procedures.

### Storage Information

This product has a shelf life of 30 months after manufacturing when stored at room temperature.

### First Aid

For external use only. Avoid eye contact. Should product enter the eyes, rinse immediately with plenty of water. Seek medical advice, if condition persists.

### Additional Information

Expert reports and certificates are available upon request.

### Available Pack Sizes

Stock Code	Size	Case Quantity	Suggested Dispenser
SCL30ML	30 mL Tube	100	
SCL100ML	100 mL Tube	12	
SCL1L	1 Liter Cartridge	6	RES1LDS

### Skin Compatibility Tests

Stokolan® Classic is proven to have very good skin compatibility properties in human-experimental tests and in practical use.

Medically certified skin compatibility expert reports prepared by Prof. Dr. med. S. W. Wassilew, MD for Dermatology, Allergology, Environmental Medicine, are available upon request.

### ECARF Seal of Quality

The European Centre for Allergy Research Foundation (ECARF) awards the ECARF-quality seal to allergy-friendly products. Cosmetics can receive this seal when following criteria are met:

1. Quantitative risk assessment of the product ingredients with respect to their potential for sensitization, taking into account their specified conditions of use and amount
2. Medically supervised clinical trials by volunteers with atopic dermatitis
3. Approved system of quality control management

### Moisturizing Effect

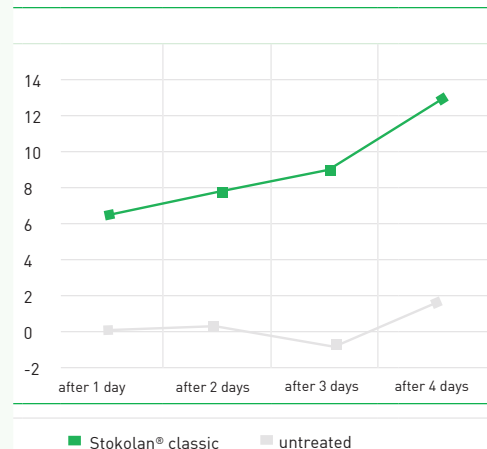

In order to investigate the moisturizing properties of Stokolan® Classic the care product was applied twice daily at an interval of approx. 5 hours to the skin of 9 test persons (0.1 g/cm<sup>2</sup> for 2 minutes, followed by the removal of any remains by means of a soft paper tissue).

Repetition of this application for a total of 4 days. The starting values for the skin moisture were determined in the morning by means of the Corneometer® before the first application and any changes to the skin moisture not before the morning of the subsequent day.

Result:

If Stokolan® Classic is applied twice daily this results in a continuous increase in the hydration of the stratum corneum. The skin moisture is clearly improved by Stokolan® classic while the untreated skin remains approximately on the same moisture level as it was when the experiment was started.

Increase of skin moisture

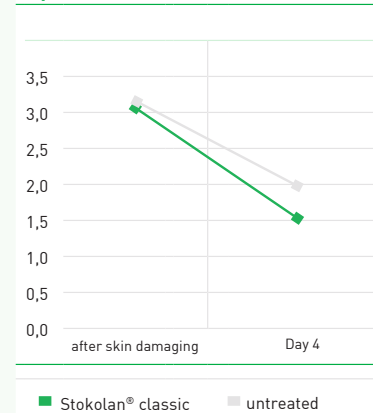

## Effectiveness Test

For a skin regeneration test the skin of 15 test persons was damaged by occlusive application 0.5% sodium lauryl sulphate solution over 12 hours. The resulting damage of the skin was classified by means of two parameters: visual (VS, irritation score according to Frosch and Kligman) and by means of the trans-epidermal water loss (TEWL as an indicator of the skin barrier quality). After recording these damage parameters (day 1) Stokolan® Classic is applied for the first time and renewed after approx. 5-6 hours on the same day. This procedure is repeated on days 2 and 3, i.e. Stokolan® Classic is applied twice daily. On day 4 the skin parameters are recorded in the morning and the skin regeneration is assessed.

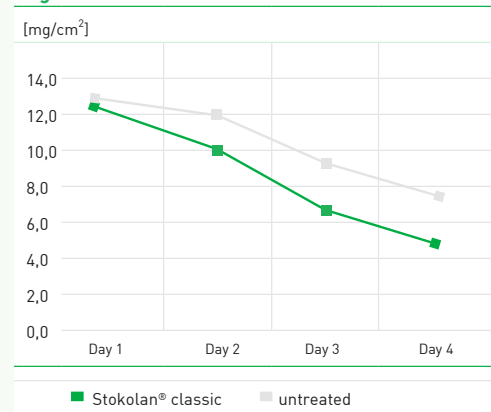

### Result:

The use of Stokolan® Classic supports the skin regeneration, as both the visually apparent damage and the barrier damage characterized by the TEWL could be much reduced by the application of Stokolan® Classic.

### Improvement of skin condition - VS

### Regeneration of skin barrier - TEWL
